

Easy View - Crystal Reports Viewer

Easy View is a great low cost solution for distributing and viewing your Crystal Reports files (.rpt). It is the only Crystal Reports Viewer you will ever need.

With Easy View there is no need to purchase an expensive copy of Crystal Reports for every one of your employees that needs a Crystal Reports Viewer. Crystal Reports is a great tool for analyzing data but the fact is that most of your employees don't need a full copy of Crystal Reports. All they really need is a way to view and distribute reports that were already made for them. Easy View does this and much more.

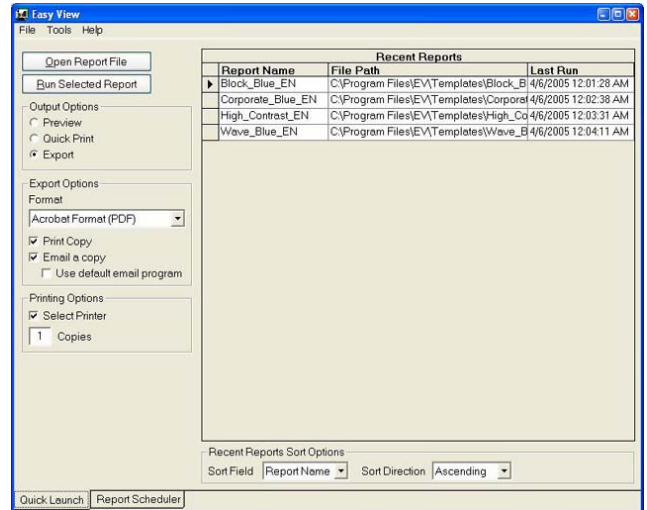

Of course can do all the things you expect from a Crystal Reports Viewer. Easy View can view and print all of your Crystal Reports (.rpt) files but that is just the beginning. Easy View can also export the report files into many popular formats (PDF, Excel, Word). These files can be emailed directly from Easy View.

Unlike other Crystal Reports Viewers, Easy View comes with everything you need in a Crystal Reports Viewer. We don't try to sell you different programs for viewing, exporting, scheduling and emailing your Crystal Reports. With Easy View its all there in 1 convenient place.

One of the most powerful features of Easy View that separates it from other Crystal Reports Viewer is the 'Report Scheduler'. The Report Scheduler can run reports automatically at any intervals you want. This can be as simple previewing or printing a report or much more complex. Easy View can also automatically export a file into the format you want, attach it to an email and send it off to everyone you specify. What can be easier than that?

Need to integrate Easy View with other applications or schedulers that you have? No problem. Easy View has full command line support which means that it can be activated from any program that can start an EXE file with command line parameters. This means that Easy View can be used with Batch files, Windows scheduler and many other programs.

Don't wait another minute. Stop wasting your company's time and money, download Easy View - Crystal Reports Viewer for a free 30 day trial and see for yourself. You won't be disappointed.

Key Features

- Easy View has more features than any other Crystal Reports Viewer on the Market at a great price.
- View, print and export any of your Crystal Reports (.rpt) files.
- Run and email your Crystal Reports right from Easy View
- Powerful report scheduler that automates the task of running and distributing your Crystal Reports to people without a Crystal Reports Viewer.
- Command line support so Easy View can be activated from external programs, batch files and schedulers.

Saves Money

With Easy View there is no need to purchase an expensive copy of Crystal Reports for every one of your employees that needs a Crystal Reports Viewer. Crystal Reports is a great tool for analyzing just about any part of your business but the fact is that most of your employees don't need a full copy of Crystal Reports. All they really need is a way to view and distribute reports that were already made for them. Easy View does this and much more.

Saves Time

Do you run the same crystal reports every day, week or month? Let Easy View do work for you with its powerful crystal report scheduler. You can configure the report scheduler to run as many reports as you want whenever you want. Reports can be automatically displayed on the screen, printed and exported. Easy View can export the report into your favorite format, attach it to an email and send to anyone you want all without the touch of a button.

Flexible

Easy View is the most flexible Crystal Report Viewer you will ever use. You can preview, print, export and email any of your Crystal Reports (.rpt) files manually or automatically. Easy View has many options that let you determine exactly how the crystal report will run. This helps you save time by not making you go through the same steps over and over each time you run a crystal report.

Export Reports

Crystal Reports can be exported to many popular formats for distribution to people that don't have Crystal Reports or a Crystal Report Viewer. Acrobat Format (PDF), MS Word (DOC), MS Excel (XLS), Rich Text Format (RTF), Text (TXT), Comma Separated Values (CSV), Crystal Reports (RPT), Tab-separated text (TTX), HTML, XML

Email

Need to run a Crystal Report and send the results out? Easy View has full email support. Reports can be attached to an email using your own email program or sent directly from Easy View. Easy View can also access your MS Outlook contact list directly saving you time when send emails.

Command Line Support

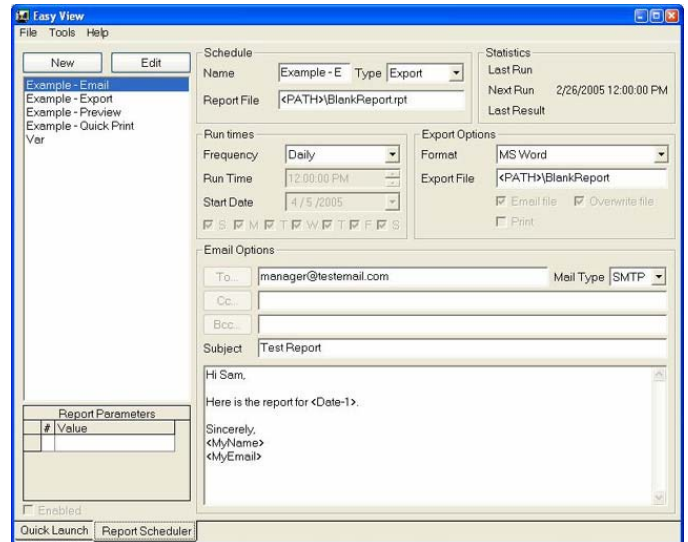

In the rare cases that the built-in report scheduler is not enough Easy View can be activated directly with full command line support. Easy View can be activated from the Windows scheduler, batch files, DOS commands or any program that can start an EXE file with command line parameters. This means that Easy View can be used in conjunction with a virtually unlimited number of external applications and processes making it an incredibly powerful crystal report viewer.

Recent Reports List

Easy View keeps a list of the crystal reports you have run recently so that they can easily be run again with a click of your mouse.

Stores database passwords

Your login information can be stored securely in Easy View. This gives you the ability to run reports automatically without having to type in the login information each time.

Password protected

Easy View can be password protected to prevent unauthorized people from using the crystal report viewer to run your Crystal reports.

Automatic updates

Easy View continuously checks for program updates and lets you know when they are available for download. Updating your Crystal Report Viewer is as simple as clicking a button.

Virtually all databases are supported

Easy View can run crystal reports that connect to just about any type of database. Many databases are supported directly by the crystal report viewer. For databases that are not directly supported it is usually just a matter of installing special drivers for the database. Easy View also supports Crystal Reports that connect to multiple databases from 1 report.

Import / Export

If you are using multiple copies of Easy View within your company, you can use the import / export features to easily distribute data and settings to all users.

Saves report parameters

Easy View saves your report parameters so you don't have to type them in over and over each time you run a Crystal report.

Update data over the web using HTML and XML

The web is great way to distribute information quickly and easily. With a little help from the Easy View report scheduler, updating information on your internal network or web server is a snap. You can use the Easy View report scheduler to export reports to HTML or XML file formats at regular intervals and save the files to a web server or some other convenient place on your network. These files can be viewed by anyone with a web browser or used by another program to process the XML data.
